The World Book Kids home page provides simple navigation.

World Book Kids now part of Iowa AEA Online

World Book Kids is now part of the World Book Online Reference Center suite of products available at Iowa AEA Online www.iowaonline.org

Colorful illustrations, diagrams, and maps enrich thousands of articles.

World Book Kids is an online product created with content from World Book's Student Discovery Encyclopedia. World Book Kids was created in partnership with Douglas Love, author of more than 25 best-selling children's activity books, plays, and educational television shows. Love has worked with World Book to create a product that combines World Book's content with fun and inventive activities to engage children's different learning styles.

World Book Kids is designed for younger users, English-language learners, and reluctant readers. The site offers simple navigation, easy-to-read content, bright colors and a graphical design. Thousands of colorful illustrations, diagrams and maps enrich articles selected for appeal and curricular standards. Teacher guides provide instructions and stimulating ways to use the content in the classroom setting.

World Book Kids' activities offer fun and useful teaching tools. Four categories—"Think it!", "Be it!", "Make it!", and "Play it!"—cover a variety of curriculum topics. Each student activity has a "Teach it!" section, which contains resources for educators, including correlations to standards and printable activity worksheets for use in the classroom or at home.
